DETAILED ACTION

Election/Restrictions

1). The disclosure is objected to because of the following informalities:

- There is no Figure 1a, as stated in the specification, page 7, line 21.
- There is no Figure 6, as stated in the specification page5, line 18, and page 7, line 17.
- Specification page 6, line 11, refers to an item 34; there is no item 34 disclosed in the Figures presented.
- Specification page 6, line 17 refers to an item 30; there is no item 30 on the Figures enclosed with the specification.

Appropriate correction is required.

2). This application contains claims directed to the following patentably distinct species of the claimed invention:

- A. The design embodiment as shown in Figure 1.
- B. The design embodiment as shown in Figures 3-4.

Art Unit: 3641

C. The design embodiment as shown in Figures 6-7.

D. The design embodiment as shown in Figures 10-12.

3). Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 6 are considered to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3641
